

柯俊明周报

2015.12.28-2016.1.4

This week my main works are as follows:

- Assisting Junhua Lu in writing **Predictive Visual Analytics** in the references section.
- Preparing for the project **Criminal Forecast**, and I have received incoming calls from teacher Yinghua He, and we have made the plan for the next step.

Monday-Tuesday

Checked the format of the references and corrected it, finally I finished this problem and submitted my Latex files to Junhua Lu.

Wednesday

Finished my own homework on C Plus Plus, and submitted this to my teacher. In the evening, I have listened to the lesson about visual analytics by teacher Yingcai Wu.

Thursday

Have received incoming calls from teacher Yinghua He, and he has told me about the tasks which we should do in the following weeks. The following steps are mine:

- To select randomly sample of 1000000 male from Hangzhou database
- Make a count on the data above, and make a statistical table.
- I will go to the T-gram for the MATLAB results in the next Monday.

Friday

New Year's Day

Found mistakes of **Predictive Visual Analytics** and checked it.

Saturday

Corrected the format of **Recent Progress and Trend of Predictive Visual Analytics**.

Sunday

Enjoyed playing with friends.
